Mudra Patel

Data Analyst

Naroda, Ahmedabad Phone: +91-7227878877 patelmudra05@gmail.com linkedin.com/in/mudra-patel

Objective

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Academic Performance

B.Tech. Computer Engineering
LDRP Institute of Technology and Research

HSC
Gayatri Vidhayalay, Ahmedabad

SSC
Maharishi Sandapani School, Ahmedabad

Skills

Professional Skills
Programming & Querying: Python, SQL
Python Libraries: Pandas, NumPy, Matplotlib, Seaborn
Data Visualization & BI: Power BI, Tableau, Advanced MS Excel
Analytics: Data Cleaning, EDA, Descriptive Statistics, Data Interpretation, Insight Generation

Soft Skills
Analytical Thinking, Problem Solving, Data Storytelling, Business Communication, Attention to Detail, Collaboration

Projects

The Discount Addiction Problem — Growth & Product Analytics

- Tools: SQL, Python, Pandas, NumPy, Seaborn, Matplotlib, Power BI
- Analyzed discount impact on repeat purchases, returns, basket size, and customer value.
- Performed customer segmentation and cohort analysis to identify discount-dependent customers.
- Applied EDA, regression, discount elasticity, and CLV analysis to evaluate promotion effectiveness.
- Built a discount allocation simulator to compare blanket vs. targeted promotions.

The Profit Behind the Revenue — Profitability & Business Analytics

- Tools: SQL, Python, Pandas, NumPy, Excel, Power BI
- Analyzed product profitability to identify high-revenue but low-profit products.
- Calculated Contribution Profit using discounts, shipping, returns, product costs, and payment fees.
- Used SQL, Python, and Excel for data cleaning, EDA, and profitability analysis.
- Built a Power BI dashboard to track revenue, margins, returns, and product profitability.

Inventra - Inventory Intelligence System — Data Analysis

- Tools: Python, Pandas, NumPy, Matplotlib
- Analyzed sales and inventory data to identify trends and product performance.
- Cleaned and transformed data using Python, Pandas, and NumPy.
- Conducted EDA to identify slow-moving products, demand patterns, and stock-out risks.
- Generated insights to support inventory planning and business decisions.

Certifications

- **Data Analysis with Python - IBM, Coursera (2026):** Completed an IBM-authorized course in Data Analysis with Python.
- **Getting Started with Microsoft Excel - Coursera (2026):** Completed a practical project focused on Microsoft Excel.
- **Advanced Green Skills & Artificial Intelligence - Skills4Future Program (2026):** Completed the advanced Green Skills and Artificial Intelligence course under the Skills4Future Program.

Interests

- Data Storytelling & Visualization
- Competitive SQL & Analytics Challenges
- Business Intelligence Trends
